**Client** : St. Paul's Primary Catholic School  
**Role** : Project Architect, Lead Consultant  
**Certification** : 2018 BEAM Plus-NB [v1.2] Provisional Gold

### Project Description:

Extension and Conversion to St. Paul's Catholic Primary School. This project is a new school extension development to provide new facilities in accordance with the latest standard of Schedule of Accommodation supported by Education Bureau. The new annex, catering whole-day school provisions with additional classrooms, multipurpose area, library, general studies rooms, staff rooms, and small group teaching rooms, is located and connected to the existing primary school building. The exist building held an essential place in the surrounding vernacular and was listed as a grade 2 Historic Building by the Antiquities and Monument Office.
