

## HKJC SHATIN STABLES REFURBISHMENT

**Location** : Shatin, Hong Kong  
**Date of Completion** : 2014  
**Site Area** : 20,800sqm  
**Client** : Hong Kong Jockey Club  
**Role** : Executive Architect, Authorized Person, Sub Consultant

### Project Description:

Leigh & Orange has completed the phased refurbishment of the six blocks of three-storey stables at Shatin Racecourse that it had originally designed in the 1980s and 1990s. All internal finishes and systems have been replaced with a particular emphasis on increasing horse welfare – as evidenced by the provision of a window in each stall which can be opened in the cooler season. The facilities for the trainers and grooms have also been up-graded – while the installation of a central chilled water plant and distribution system has greatly reduced the environmental footprint of the whole stables complex.
