**Fit-out Area** : 205sqm  
**Client** : Chung Chi College, The Chinese University of Hong Kong  
**Role** : Interior Designer

### Project Description:

Welcome to Chung Chi College Living Room, where students' holistic well-being is nurtured and inspired, aligning with the college's motto, 'In Search of Excellence.'

At Living Room, we harness the power of the senses to elevate the student experience. Through meticulous design and attention to detail, we have curated five essential components – Touch, Ambience, Hearing, Sight, and Smell. Each element is meticulously crafted to provide a sensory journey that enhances learning and studying.

Upon entering Living Room, visitors will find a thoughtfully designed environment aimed at promoting tranquility. The space features comfortable textures underfoot and calming audio elements. Ambient lighting provides a warm glow, contributing to a soothing atmosphere. Additionally, natural sounds, such as rustling leaves, enhance the overall experience.
