

RAYCOM CITY

Location	: Hefei, China
Date of Completion	: 2012-2016
Site Area	: 428,000sqm
Client	: Confidential
Role	: Design Architect

Project Description:

Located within the new Economic Development Zone in Hefei city, this urban community will offer more than one million sqm of living space. As part of the design, an EW oriented green belt is formed to provide a landmark open space for this new community, promoting the idea of "living within the park". Local construction methods and materials have been used. By maximizing the geography potential, terrains have been formed which allow ground plane to be elevated. Traffic is therefore redirected to underground, enabling vehicular-free "garden extension" design concept. The project occupies five nos of plots. With a total site area of 428,000 sqm, and construction area of 1.45 million sqm, the development will comprise of residential, retail, clubhouses, schools, kindergartens and parks.
